Infant Mortality

Cemal Cicek

5 October 2019

Infant Mortality

Babies die earlier when in natal $\odot/\text{☾}$, $\♂/\text{♁}$ and AC are harmonic (2^{n} Harmonics). In the examples, which are AC with the sun/moon and mars/saturn not harmonic, we need precise birth times and precise coordinates of the birthplace.

Three days old baby

The Astrology of Death by Richard Houck (p.265 German)

Born : 26 April 1991 at 12:42 Brooklyn, New York, USA.

Died : 29 April 1991 at 10:30 Brooklyn, New York, USA.

Richard Houck studies in his book with a horoscope of an infants that the three days after birth died.

Harmonic 64

Natal $\odot/\text{☾}$ = Natal $\♂/\text{♁}$ = Natal AC

We know that the tertiary moon phases take about 3.5 months and secondary moon phase 3.5 years.

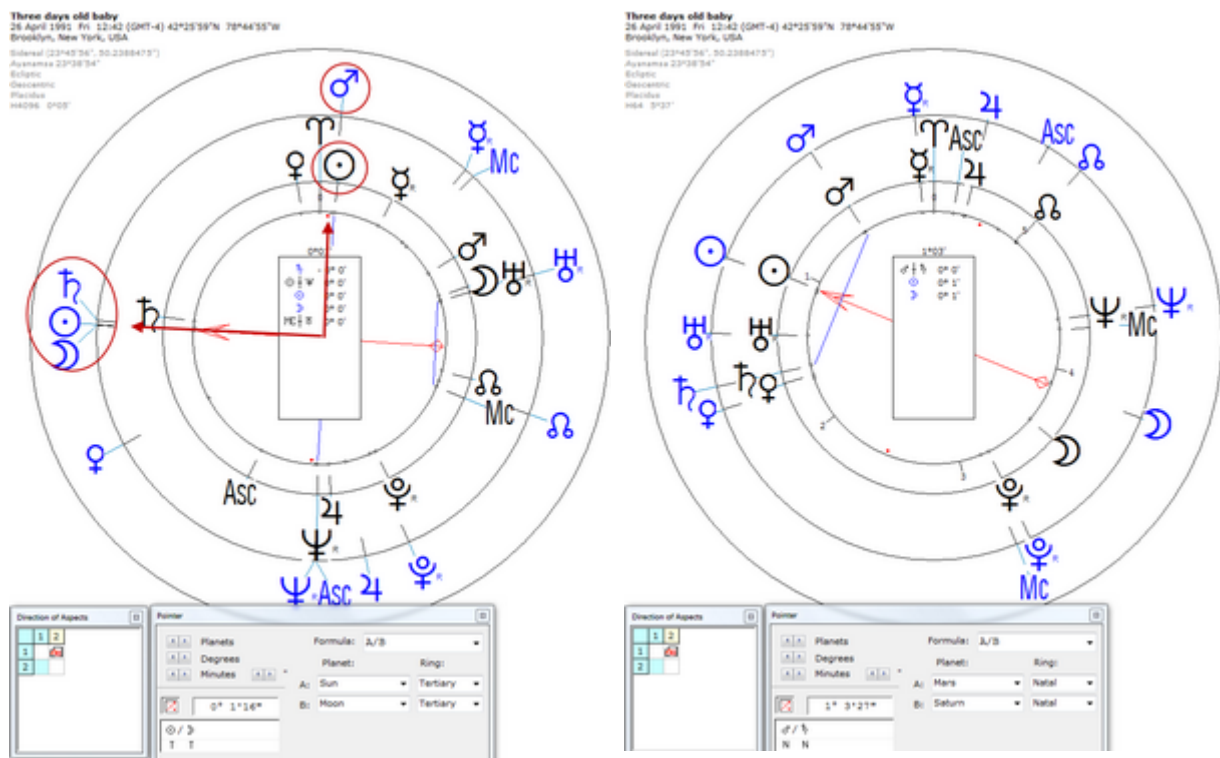

When we look at astrology program, we see that the next tertiary moon phase is on 25 Jun 1991. But child died three days after birth on 29.04.1991.

We are looking 4096 harmonic.

In Tertiary progression we let the moon run so long that it is with the tertiary sun exact is and stand in a dangerous midpoint.

On 27.04.1991 at 04:03 the sun and the moon exactly with the tertiary mars / saturn and with the natal sun.

Harmonic 4096 (Tertiary Progressed lunar phase)	Harmonic 64 (Tertiary Progressed lunar phase)
On 27.04.1991 at 04:03	On 27.04.1991 at 04:03

Ter-Sun 12 19' 33" AR
 Ter-Moon 17 00' 48" VI
 difference : 25° 18' 45" - (22° 30' 00" + 2° 48' 45") = 0° 0' 0"

I wanted to show with this example that we can divide the moon phases not only on 8 but still several parts. For example every eighth moon phase can divide again at 8.

When the sun and moon are harmonic to each other, it is a moon phase. Whether angle between sun and moon is 90 degrees or 45° or 5° 37' 30" does not matter. For this we need more research and software that can calculate smaller moon phases.

Anderson, William

13 November 1947 at 07:41 (= 07:41 AM)Roswell, New Mexico, 33n24, 104w31

American baby born with anencephaly.

Death, Cause unspecified 24 November 1947 (Died of inanition and anemia, age nine days)
